

PARKES PRODUCTS - ROOFING

Our range of roofing products guarantee the level of service that you require and stand the test of time that you expect.

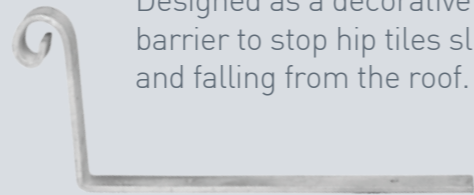

GUTTER BRACKETS

We have a range of gutter brackets to suit all situations.

Whatever you need, we can supply.

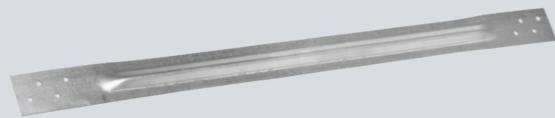

HIP IRONS

Designed as a decorative barrier to stop hip tiles slipping and falling from the roof.

HERRINGBONE STRUTS

Herringbone Struts are used instead of timber noggins, fixed between the joists to minimise timber twisting and lateral movement.

ALUMINIUM SOAKERS

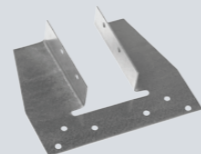

Aluminium Soakers are used as an economical alternative to lead flashing when forming a pitched wall against another.

NAIL PLATES

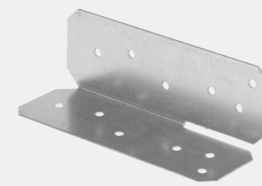

Nail Plates are a versatile flat connector for joining two or more pieces of timber that butt up to each other.

TRUSS CLIPS

Truss Clips are used to secure timber trusses to the wall plate, they remove the danger of damage to the timbers from inaccurate cross nailing.

FRAMING ANCHORS

Anchors are a versatile and simple method of trimming and timber jointing, they are also easily formed on site.

GALLOW BRACKETS

Gallows brackets are used to support the remaining chimney stack when removing the fire places and chimney breasts below.

SNOW GUARDS & BRACKETS

Snow / tile guard brackets are used to secure the guards in the correct position.

FIXING BAND

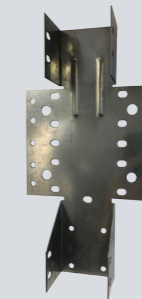

Parkes Multi Holed Fixing Band is used for light duty general bracing of a non-structural nature. It is easy to cut, bend and shape.

RIDGE RAFTER CONNECTOR

The Ridge to Rafter connector provides alignment control when fixing rafters to the ridge timber and can accommodate any slope up to an angle of 30°.

SLOPE ADJUSTABLE HANGER

Adjustable slope hangers are used to support joists or rafters from main timbers and can be sloped up or down by up to 45° once on site.

ORDER TODAY
